## OPTIONS

Extensive options are offered with the STA1340 and include: integral pre-amplifiers, gain control, linearisers and block upconverters. The options are defined by adding to the base number as shown below:

(Consult e2v technologies for availability of options).

### Frequency Options

The STA1340 is offered in two frequency bands:

- KU1 - 13.75 – 14.50 GHz
- KU2 - 12.75 – 14.50 GHz
- KU3 - 14.00 – 14.50 GHz (upconverter option only)

### Pre-Amp Option

The pre-amp option can be selected from any of the following:

- C - No pre-amp (typical SSG 52 dB).
- A - Integral solid-state amplifier (typical SSG 78 dB).
- D - As option 'A' but includes an attenuator to provide 25 dB (min.) of gain control.
- Z - Integral lineariser that improves the linearity of the HPA, providing a C/I of typically -26 dBc at 4 dB OPBO. The lineariser also incorporates the pre-amp and gain control options. (Consult e2v technologies for availability).

### Input Option

The STA1340 can be offered with an L-Band Block Upconverter. Specify:

- N - Standard RF
- U - L – Ku-Band Block Upconverter (see page 4)

**Note:** the upconverter requires the inclusion of either the 'D' or 'Z' options. (Consult e2v technologies for availability).

### Break-Out Links

Available only with the upconverter option, this enables bypassing of the upconverter and can be used for monitoring, set-up, redundant switching etc. Specify 'S' for Break-Out Links (leave blank if not required).

## HEALTH AND SAFETY HAZARDS

e2v technologies electronic devices are safe to handle and operate provided that the relevant precautions are observed. e2v technologies does not accept responsibility for damage or injury resulting from the use of electronic devices it produces.

### High Voltage

Dangerous voltages are present within the TWT amplifier when operating normally. However, the equipment is designed so that personnel cannot come into contact with high voltage circuits unless covers are removed.

### RF Radiation

All RF connectors must be correctly fitted before operation.

### Beryllia

The TWT in the amplifier contains beryllium oxide ceramic parts. These are not accessible unless the TWT casing is damaged. Consult e2v technologies regarding the disposal of damaged or life-expired tubes.
