

# 100 Watt C-Band Outdoor High Power SSPA

## FEATURES

- No Shelter Required
- Short Waveguide Run
- Low Cost Installation
- Removable Power Supply
- Complete Digital M&C Reference
- RS-232/422/485 Interface
- Built-in Redundancy Control

The **XTS-100C** high power solid state power amplifiers are compact, fully integrated antenna-mount units designed for low cost operation and longevity. Intended for outdoor operation, the **XTS-100C** eliminates the need for a separate amplifier shelter. In addition, the distance between the amplifier and the antenna feed can be shorter, thus eliminating long waveguide runs and associated RF losses.

RF Filters, cooling, and monitor and control (M&C) systems are all self-contained within the package. A high frequency resonant conversion power supply is used that accepts a wide range of prime power (90 to 264 VAC). A remote external controller is available to operate the SSPA from a user-selected location.

Depending upon user requirements, these high power amplifiers can be configured for single thread, redundant, or phase combined configurations. Mounting brackets are supplied to mount the high power amplifier to most popular antennas.
